

CONTENTS

I. GENERAL NOTIONS	11
I.1. Body fluid volumes	11
I.2. Functional systems of the cells	14
I.2.1. Ingestion by the cells: endocytosis	14
I.2.2. Digestion inside the cell	14
I.2.3. Synthesis and formation of cellular structures	15
I.2.4. Extraction of energy from nutrients.....	16
I.2.5. Transport of substances through the cell membrane	17
I.2.5.1. Diffusion	17
I.2.5.2. Active transport	19
II. NERVOUS SYSTEM	21
II.1. Neuron	22
II.1.1. Axoplasmic transport	24
II.1.2. Neuron properties	24
II.1.2.1. Excitability	25
II.1.2.2. Conductibility.....	30
II.1.2.3. Degeneration and regeneration.....	34
II.2. Synapse	35
II.2.1. Electrical synapse.....	35
II.2.2. Chemical synapse.....	36
II.2.3. Neuromuscular junction	42
II.2.4. Synapse en passant.....	43
II.3. Reflexes	44
II.3.1. Reflex arc	44
II.3.1.1. Sensory receptors	44
II.3.1.2. Sensory nerves (afferent fibres)	46
II.3.1.3. Interneurons.....	47
II.3.1.4. Motor neuron (efferent fibres).....	47
II.3.2. Classification of the reflexes	50
II.3.2.1. Monosynaptic reflexes	50
II.3.2.2. Polysynaptic reflexes.....	56
II.4. Spinal shock	60
II.5. Somatic sensations	61
II.5.1. Tactile sensations	61
II.5.2. Major levels of central nervous system function	63

II.5.3. Sensory pathways for transmitting somatic signals into the central nervous system	65
II.5.3.1. Dorsal column – medial lemniscal system	66
II.5.3.2. Anterolateral system	67
II.5.4. Somatosensory cortex	70
II.5.4.1. Somatosensory area I	70
II.5.4.2. Somatosensory area II	72
II.5.4.3. Somatosensory association areas	72
II.6. Motor functions	73
II.6.1. Motor cortex	73
II.6.1.1. Primary motor cortex	73
II.6.1.2. Premotor area	74
II.6.1.3. Supplementary motor area	74
II.6.2. Transmission of signals from the motor cortex to the muscles	74
II.6.2.1. Corticospinal (pyramidal) tract	74
II.6.2.2. Extrapyramidal system	77
II.7. Cerebellum	78
II.8. Formatio reticularis	81
II.9. Pain	83
II.9.1. Pain receptors (nociceptors)	83
II.9.2. Pathways for transmission of pain signals into the CNS	84
II.9.2.1. Neospinothalamic tract	84
II.9.2.2. Paleospinothalamic tract	85
II.9.3. Pain suppression system	86
II.9.4. Visceral pain	88
II.10. Autonomic nervous system	90
II.10.1. Sympathetic nervous system	91
II.10.2. Parasympathetic nervous system	96
II.10.3. Sympathetic and parasympathetic “tone”	98
II.10.4. Autonomic reflexes	98
II.10.5. Control of the autonomic nervous system	99
II.11. Vestibular system	100
II.11.1. Vestibular receptors	100
II.11.1.1. Semicircular ducts	100
II.11.1.2. Utricle and saccule	105
II.11.2. Vestibular pathways	107
II.12. Thalamus	108
II.13. Limbic system	111
II.13.1. Hypothalamus	111

II.13.2. Hippocampus.....	112
II.13.3. Amygdala	113
II.14. Memory	114
II.14.1. Short-term memory	114
II.14.2. Long – term memory	118
II.15. Forgetting	120
II.16. Addiction	121
III. THERMOREGULATION	123
III.1. Thermogenesis	124
III.2. Thermolysis	126
III.3. Mechanisms activated by cold	129
III.4. Mechanisms activated by heat	129
IV. MUSCLES	130
IV.1. Smooth muscle	130
IV.1.1. Smooth muscle cells	130
IV.1.2. Smooth muscle types	133
IV.1.3. Stress-relaxation of smooth muscle	135
IV.1.4. Reverse stress-relaxation of smooth muscle.....	135
IV.1.5. Regulation of smooth muscle contraction	136
IV.1.6. Nervous control of smooth muscle contraction	137
IV.1.7. Chemical control of smooth muscle contraction	137
IV.1.8. Hormonal control of smooth muscle contraction	137
IV.2. Skeletal muscle	139
IV.2.1. Skeletal muscle fibre.....	139
IV.2.2. Skeletal muscle composition	143
IV.2.3. Skeletal muscle proteins	143
IV.2.4. Mechanism of skeletal muscle contraction.....	146
IV.2.5. Skeletal muscle relaxation	148
IV.2.6. Mechanics of skeletal muscle contraction	149
V. RESPIRATORY SYSTEM	151
V.1. Pulmonary function	151
V.1.1. Structure of the respiratory system	152
V.1.2. Inspiration	154
V.1.3. Expiration.....	157
V.1.4. Physical aspects of ventilation	158
V.1.4.1. Intrapulmonary and intrapleural pressures.....	159
V.1.4.2. Transpulmonary pressure.....	160
V.1.4.3. Physical properties of the lungs	160
V.1.5. Pulmonary ventilation	165

V.1.6. Alveolar ventilation.....	166
V.2. Gas exchange	168
V.2.1. Oxygen transport from the atmospheric air into the tissue cells	168
V.2.1.1. Oxygen diffusion from alveoli into the blood.....	169
V.2.1.2. Oxygen transport in the blood.....	171
V.2.1.3. Oxygen diffusion from blood into the tissue cells	171
V.2.2. Carbon dioxide transport from tissue cells into the atmospheric air.....	172
V.2.2.1. CO ₂ diffusion from cell into the blood.....	172
V.2.2.2. Transport of the CO ₂ in the blood.....	172
V.2.2.3. CO ₂ diffusion from blood into alveoli	174
V.3. Nervous control of respiration	175
V.3.1. Respiratory centre	175
V.3.1.1. Dorsal respiratory group of neurons	176
V.3.1.2. Pneumotaxic centre	177
V.3.1.3. Apneustic centre.....	178
V.3.1.4. Ventral respiratory group of neurons	178
V.3.2. Hering –Breuer reflex	178
V.4. Chemical control of respiration	179
V.4.1. Chemosensitive area of the respiratory centre	179
V.4.2. Peripheral chemoreceptor system	180
